

Accelerate The Cloud Journey

Organizations are constantly looking to accelerate their cloud journey to facilitate digital transformation. With greater awareness and advantages the cloud offers in terms of innovation and efficiency, organizations are transitioning their operations to the cloud.

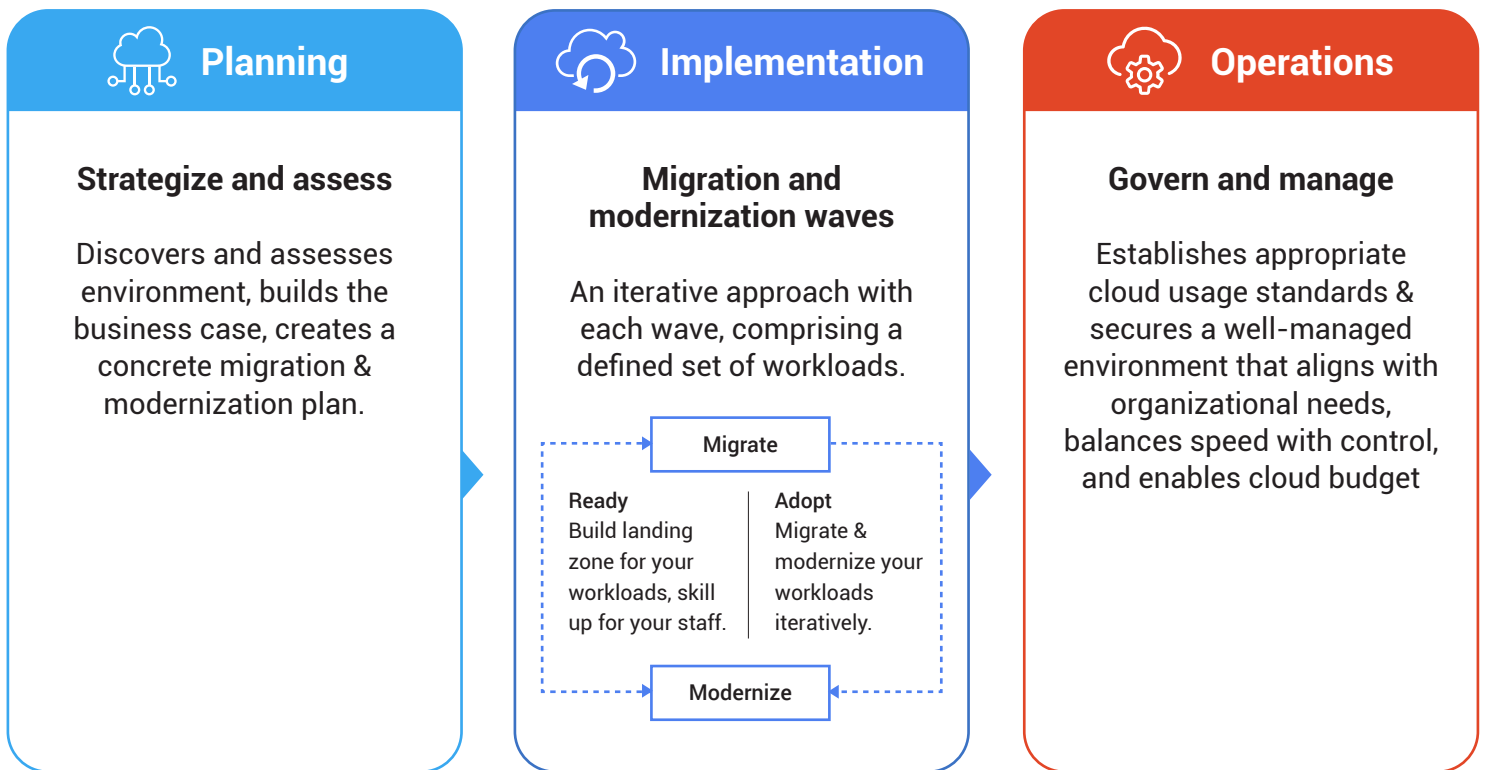

With multiple siloed LOBs, organizations adopt a centralized approach to address reusability, standardization, optimization, and data security control in their transformational journey. Additionally, they look to safeguard their ROI against a dynamically evolving technology landscape.

To accomplish this, organizations need an expert and partner to help them manage their cloud strategy and execute an outcome-driven approach.

Transform with cloud

WinWire supports organizations at every stage of their cloud journey. We have end-to-end cloud capabilities, tools, and experience to navigate the complexities of cloud migration & optimize once you are on the cloud. We partner with companies to help customers get there faster through our proven and meticulous approach.

Stages of migration and modernization journey

WinWire's Cloud Capabilities

Planning

Strategy, Assessment & Roadmap

- **Cloud Application Strategy** – Develop a detailed strategy to enable organizations for smart and deliberate decisions regarding cloud initiatives.
- **Business Goal Assessment** – Define and align work streams with a focus on business priorities at each step.
- **Application Migration & Assessment Planning** – Implementing an appropriate migration process that facilitates business continuity and prevents disruption.
- **Infrastructure Assessment & Planning** – Providing a comprehensive pathway to cloud migration, enabling customers to reduce decision risks, accelerate user adoption and lower total cost of ownership.

Implementation

Cloud Transformation & Migration

- **Cloud Infrastructure Transformation** – Build, modernize and manage your critical business infrastructure in a secure cloud environment.
- **Cloud Native Custom Development** – Provides an end-to-end solution to create, build, and deploy a cloud-ready web application in minutes.
- **Cloud Application and Modernization** – Migrate/Modernize legacy and monolithic business applications to cloud.
- **Cloud Migration Services** – Our comprehensive cloud migration framework brings capabilities together with pre-configured tools and methodology.
- **DevOps Services** – The service span across the application life cycle and can be used for any application.
- **Cloud Journey Management** – We use automated cloud management and migration tools to support a smooth transition.

Operations

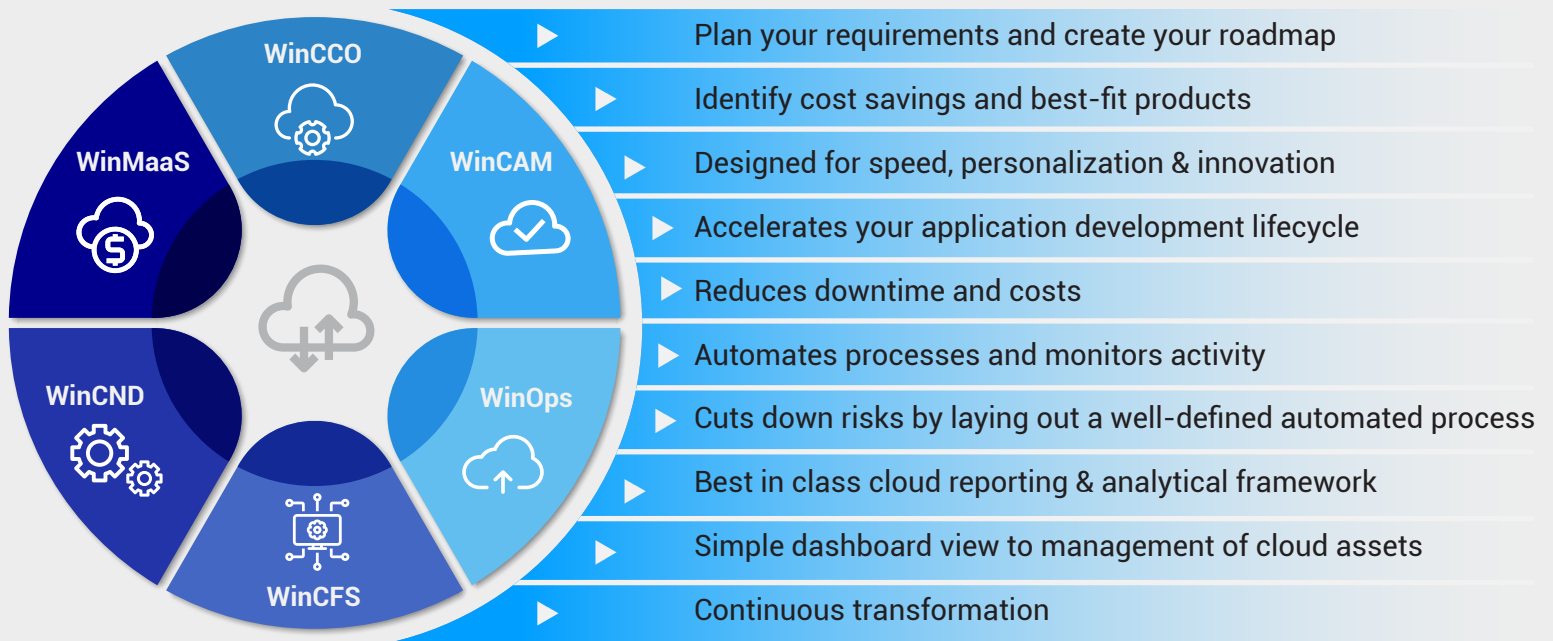

Cloud Management & Optimization

- **Cloud Operations** – Set up processes and reporting; operate and manage the multi and hybrid cloud infrastructure and applications.
- **Security Operations** – Enables seamless mitigation through multiple integrated solutions with no workflow disruptions.
- **Cloud Optimization** – Analyzes and configures the allocation of cloud resources that power applications, infrastructures, and workloads to maximize performance.
- **Analytics** – Leverages AI and other analytics approaches to make data-driven decisions and gain efficiencies in their products and services.
- **Application Management** – Manage operation, maintenance, versioning and upgrading of an application throughout its lifecycle.
- **Business process operations** – Design an operating model through principles, rules and best-practices to set-up and run the new cloud organization
- **Culture Evolution** – Significantly allows organizations make gradual and fundamental shifts in their culture, processes, and technology.
- **Cost Controls** – Planning that allows an enterprise to understand and manage the costs and needs associated with its cloud technology.

Bring transformational change with WinWire's cloud services

Our comprehensive cloud services help identify business goals and success metrics, formulate a cloud strategy, quantify, and articulate the business case for your cloud transformation. We also help define technical options for transformation, discover infrastructure, applications, and modernization via the cloud, and plan the implementation leveraging the following WinWire services:

- **Cloud Cost Optimization (WinCCO)** – Helps to optimize cloud resource utilization and cloud services cost.
- **Cloud Assessment Services (WinCAM)** – Helps you optimize your investment in infra & applications.
- **Cloud Ops (WinOps)** – Manages delivery, tuning, optimization, and performance of workloads and IT services.
- **Cloud Foundation Setup (WinCFS)** – Sets up cloud infrastructure, standardized templates and automation.
- **Application & Data Modernization (WinCND)** – Creates, builds, and deploys cloud-ready web applications.
- **Cloud Migration (WinMaaS)** – Offers a proven and hassle-free methodology for the migration of workloads.

Why Choose WinWire?

Innovator

We identify, nurture, and play a substantial role in shaping our customers future with enterprise-ready disruptions.

Reusable cloud native applications

Our domain-based portfolio of reusable microservices enable organizations to promptly build native cloud applications.

AI-driven Intelligence

Our automated infrastructure management processes backed with analytics, self-healing and self-learning capabilities enables customers to focus on strategic objectives.

Simplifies complexity

We enable you to tame the complexity of cloud transformation so you can set the right course, select the right services, and achieve your business goals quickly and completely.

Results-driven cloud migration

Our certified consultants help you quickly and securely migrate and modernize your applications to the cloud using proven tools and frameworks allowing you to realize the business value faster.

Transformative capabilities

Our cloud transformation services deliver business transformation end-to-end through a combination of comprehensive cloud capabilities, expertise, tools, technologies, and partnerships that enable you to define and implement a solid business case.

Portfolio

25+ Cloud success stories

75+ Application modernized

4+ Fortune 100 clients

About WinWire

WinWire is a Data-driven Digital Engineering company that supports enterprises across Healthcare, Retail, Hi-Tech and Manufacturing and several other industry domains in navigating their digital transformation journey. WinWire enables its customers to drive business growth and gain competitive advantage by aligning business value and digital technologies, calling this process "Stitching the Digital Fabric."

WinWire has extensive expertise across a range of digital technologies and delivers large enterprise solutions leveraging cloud, AI, machine learning, mixed/augmented reality, Internet of Things (IoT), mobility, security, and UI/UX to help clients harness business value.
